

Today, April 1, 2014 we are reintroducing our 84 key Space Saving Classic product and in the coming weeks we will add 86 and 87 key chassis options.

The changes will effect UltraClassic , Classic, Spacesaver M, EnduraPro, and Classic Trackball chassis product lines. The Classic 84 key layout is being introduced first to more closely resemble the traditional 101 key layout. The size and position of the Ctrl and Alt keys on the new 84 are the same as the traditional 101. The 87 key layout includes windows and apps keys while the 86 key layout eliminates the right windows key and increases the size of the Spacebar to match the traditional 101 key layout

New Classic 84
